

# ERACAST TL65D

## 65 Shore D Polyurethane Casting Resin

---

**Era Polymers** have recently added a new Polyurethane Casting Resin to their comprehensive range of Cold Castable Urethanes.

The **Eracast TL65D** is a two component MDI polyether based polyurethane specifically designed for the tooling/prototyping market.

Advantages of the **Eracast TL65D** include:

- Easy processing at room temperature by hand or machine
- Very low viscosity
- Long pot life
- Room temperature cure
- Fast demould times
- Very low shrinkage

**Eracast TL65D** can be used to create prototypes with precision. The very low shrinkage feature of this system allows you to cast low shrinkage moulds for accurate tooling requirements. Other suitable applications include; Point of Sale Displays, Rigid Castings and Special Effects.

For more information on **Eracast TL65D** please contact **Era Polymers** on **+61 (0) 2 9666 3788** where one of our representatives will be able to assist you. Alternatively email [erapol@erapol.com.au](mailto:erapol@erapol.com.au)
